

I would like to lodge a citizen complaint.

Sinclair Broadcasting's blatant attempt to sway the electorate with an an anti-Kerry documentary right before the election is a violation of the public trust.

I do not think that this programing serves the public interest, but rather the political agenda of the company's owners. I believe that they are using there power to buy influence related to their other businesses before for pentagon. This is what we get from media consolidation. GE, Sinclair, Viacom, are using their media outlets as propaganda machines to fuel their unrelated interests.

This is proof again that media consolidation is dangerous and does not serve the public interest. Please block this. Thank you.

John Linder
